Hi Tim,

CLWA and the other 5 public agencies party to the agreement intend to manage the entire Santa Clara River Valley East Subbasin, including that ~67 acre area just west of the V.C. and L.A.C. line.

Hi Rick,

I have been working on pulling the information together that is required for submitting to DWR for the formation of the Fillmore and Piru Basins Groundwater Sustainability Agency. I have attached a map I made with the CLWA service area boundary shp that Rick Vasilopoulos sent me yesterday. Is it the 1,000ft wide wedge of East Basin that extends into Ventura County (circled in red on the map) that CLWA intends to submit as a GSA for through an MOU? Or is CLWA also planning to submit as a GSA for the 15,000ft wide portion of Piru basin within CLWA's boundary? I am sorry for my ignorance, I just want to make sure I understand CLWA's intentions. Thanks,

Tim Moore, PG, CHG

Tim,

Here is the shape file for CLWA's service boundary as requested. Let me know if there is a problem using the file.

Thanks.
