Re: Yolo and Solano Subbasins: 2018 Proposed Basin Boundary Modification

On behalf of the Yolo Subbasin Groundwater Agency (YSGA), Yolo County Flood Control and Water Conservation District (District) staff will be submitting a formal basin boundary modification request to the California Department of Water Resources (DWR) to modify the Yolo and Solano Subbasins. At the June 18, 2018, YSGA Board meeting, Directors approved of submitting a subbasin modification that alters the internal boundary between the Yolo and Solano Subbasins within Yolo County.

Since 2015, Yolo County water managers have intended to create a County-consolidated subbasin for effective groundwater management within Yolo County. During the 2016 basin boundary modification process, we were unable to include Reclamation Districts (RD) 150, 307, and 999. Since then, the YSGA has worked diligently to create a County-consolidated subbasin and is moving forward with the incorporation of RD 150 and RD 999 (see Scenario 1 of the attached map). RD 307 has requested to be included in a potential North Delta Subbasin; however, if the proposed North Delta Subbasin is not approved by DWR, the YSGA Board of Directors' also approved the inclusion of RD 307 in the Yolo Subbasin consolidation (see Scenario 2 of the attached map).

If the proposed North Delta Subbasin is not approved by DWR, the YSGA understands that the South American Subbasin will be the Yolo Subbasin's neighboring subbasin along the County boundary to the east of RD 150 and RD 307.

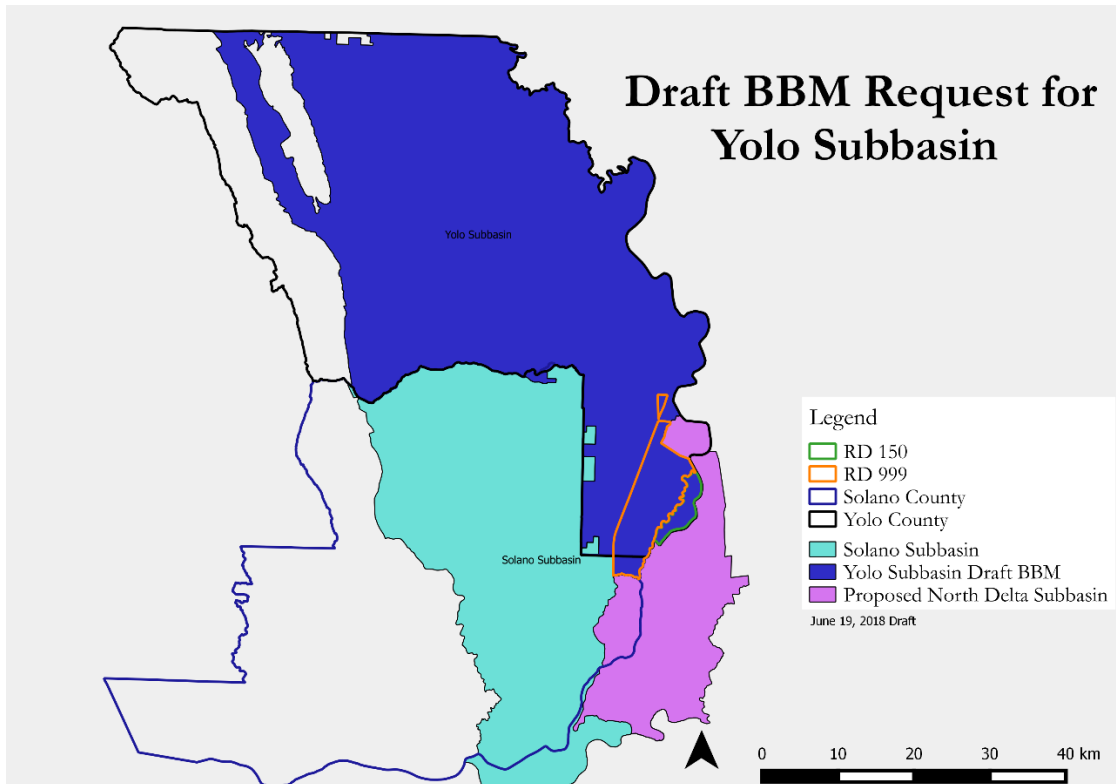

We look forward to working with Sacramento County and the South American Subbasin to develop a coordination agreement for sustainable groundwater management across county and subbasin boundaries. We appreciate any formal support Sacramento County can provide.

Please contact me with any questions at (530) 662-0265.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tim O'Halloran", with a long horizontal line extending to the right.

Tim O'Halloran
Executive Officer
