

## List of all Interested Parties

Pursuant to Water Code Sections 10723.2 and 10723.8(a)(4), the Tuolumne Groundwater Sustainability Agency will consider the interests of all beneficial users and users of groundwater, as well as those responsible for implementing a Groundwater Sustainability Plan (Plan) in compliance with the Sustainable Groundwater Management Act. These interests include, but are not limited to, all of the following:

### Holders of Overlying Groundwater Rights

#### 1. Agricultural Users

- Through continued collaboration and coordination, the interests of agricultural uses reliant on groundwater will continue to be considered within the Tuolumne GSA. The Tuolumne GSA will continue to collaborate and communicate with these agricultural water uses in the development of the Plan.

#### 2. Domestic Well Owners

- There are less than thirty domestic well owners that rely on groundwater for their domestic water supply within the proposed boundaries of the Tuolumne GSA. However, through continued collaboration and coordination, their interests will continue to be considered in the development of the Plan.

### Municipal Well Operators

- There are no municipal well operators within the proposed boundaries of the Tuolumne GSA boundary.

### Public Water Systems

- There are no public water systems within the proposed boundaries of the Tuolumne GSA boundary

### Local Land Use Planning Agencies

- The local land use planning agency within the boundaries of the Tuolumne GSA is exclusively the County of Tuolumne. Tuolumne County will collaborate and coordinate with Stanislaus County and the Cities of Modesto, Riverbank, Waterford and Oakdale as needed on the development of the plan.

### Environmental Users of Groundwater

- The Tuolumne GSA will work cooperatively with appropriate state and federal agencies and interested environmental stakeholders through continued collaboration and coordination, such that their interests will be considered within the Tuolumne GSA.

Surface Water Users, if there is a hydrologic connection between surface and groundwater bodies

- There are no surface water providers within the proposed boundaries of the Tuolumne GSA, however there may be surface water users such as riparian water users, within the GSA boundary. If there is a hydrologic connection between surface water and groundwater bodies, the Tuolumne GSA will evaluate opportunities to sustainably manage the available water resources and through continued collaboration and coordination the interests of these other surface water users will also be considered within the Tuolumne GSA.

Federal Government including, but not limited to, wildlife refuges, the military and managers of federal lands

- The U.S. Corps of Engineers and the U.S. Bureau of Land Management own land within the proposed boundary of the Tuolumne GSA. The Tuolumne GSA will continue to solicit input from these and other federal agencies to the extent necessary.

California Native American Tribes

- The subject area is historically linked to the Tuolumne-Band of the Me-Wuk Indians and the Chicken Ranch Rancheria Band of the Me-Wuk Indians of California. The Tuolumne GSA will consult with both Bands of Indians and consider their interests.

Disadvantaged Communities included, but not limited to those served by private domestic wells or small community water systems

- There are no disadvantaged communities according to the DWR Disadvantaged Community Mapping Tool within the proposed boundaries of the Tuolumne GSA

Entities listed in Section 10927 that are monitoring and reporting groundwater elevations in all or a part of the Groundwater Basin managed by the GSA:

- There are no entities currently monitoring or reporting groundwater elevations in all or a part of the proposed boundary of the Tuolumne GSA.

The Tuolumne GSA and other stakeholders' roles and responsibilities will be further considered and defined in the Tuolumne GSA's development of a plan. Additionally, the Tuolumne GSA intends to work collaboratively with the Stanislaus and Tuolumne River Groundwater Basin Association Groundwater Sustainability Agency, which manages the remainder and large majority of the Modesto Sub-basin that is not under Tuolumne GSA's boundary. Tuolumne County has also reached out to all property owners within a half mile of the proposed sub-basin boundary. The County welcomes their feedback and has requested they notify County staff should they be interested in being included in the list of interested persons to be informed of plan development and meeting notices.

If the Department of Water Resources requires anything further prior to the acceptance of this notification of the Tuolumne GSA's election to serve as the GSA for the portion of the Modesto Sub-basin within Tuolumne County's jurisdiction, please address your concerns to:
