

Triangle T Water District GSA List of Interested Parties

As required by Water Code section 10723.8(a)(4), the Triangle T Water District developed a list of interested parties, and this list will continue to be amended as necessary during the Groundwater Sustainability Plan (“GSP”) development process. As required by the Sustainability Groundwater Management Act (“SGMA”), the District will consider all beneficial uses and users of groundwater within the Subbasin, as well as those responsible for developing GSPs. The District will solicit feedback and participate in discussions with interested parties during GSP development. These interests include, but are not limited to the following:

- *Holders of overlying groundwater rights, including:*
 - o *Agriculture users.*

The District’s Board of Directors is comprised of five members, each representing the agricultural water users within the district. Therefore, agricultural users are exclusively represented on the District’s governing board.

- o *Domestic well owners.*

There are domestic wells within the GSA, however, based on the understanding of groundwater conditions that currently exist, or are likely to exist in the foreseeable future, the GSA anticipates that the plan will exclude domestic wells.

- *Municipal well operators.*

The City of Chowchilla and others operate municipal wells within the Subbasin, but not within the District’s service area. The District has been meeting regularly with municipal well operations within the Subbasin to discuss implementation SGMA, and will continue to do so.

- *Public water systems.*

The District has identified public water systems operated by Madera County, Alview-Dairyland School District and the City of Chowchilla within the Subbasin. The District will continue to work with these agencies and others identified at a later date throughout the SGMA implementation process.

- *Local land use planning agencies.*

Again, the District has been meeting regularly with the City of Chowchilla and Merced and Madera County to discuss implementation SGMA, and will continue to do so.

- *Environmental users of groundwater.*

The District is working to identify agencies advocating for environmental uses within the Basin and will work with those entities in developing the GSA.

- *Surface water users, if there is a hydrologic connection between surface and groundwater flows.*

The District has a working relationship with numerous surface water users, including the Chowchilla Water District and private riparian and appropriative water right holds, within the basin through its participation in the Chowchilla Subbasin GSA group.

- *The federal government, including, but not limited to, the military and managers of federal lands.* N/A
- *California Native American tribes.* N/A
- *Disadvantaged communities, including, but not limited to, those served by private domestic wells or small community water systems.*
The District and Subbasin working group has identified disadvantaged communities within the basin from DWR's web page, and will cooperate with Madera and Merced Counties to work with any disadvantaged communities within the Subbasin relying on groundwater supplies.
- *Entities listed in Water Code section 10927 that are monitoring and reporting groundwater elevations in all or a part of a groundwater basin managed by the GSA.*
- Again, the District has been meeting regularly with the Chowchilla Water District, City of Chowchilla and Madera and Merced Counties to discuss implementation SGMA, and will continue to do so.

The District intends to work cooperatively with other agencies, water providers, and other interested stakeholders within Merced and Madera Counties, and the State of California, regarding the sustainable management of groundwater within the Subbasins. The District intends to use its existing Board of Directors for governance purposes.
