

September 21, 2019.

The Salinas Valley Basin Groundwater Sustainability Agency (SVBGSA) is posting an update to GSA filing documents in order to resolve an overlap in the Monterey Aquifer between the SVBGSA and the Marina Coast Water District (MCWD) GSA as required by the Sustainable Groundwater Management ACT.

The overlap is resolved in this case through a change of shapefiles that recognizes MCWD's jurisdictional boundaries existing within the Monterey Subbasin and to eliminate any federal government properties from the posted maps.. The SVBGSA's boundaries have been changed to reflect this.

Two agreements have also been executed that define the responsibilities of each GSA in preparation of GSP's in the adjacent Monterey Aquifer and 180/400 Aquifer.

All shapefiles and agreements have been uploaded for review by DWR staff in an effort to resolve the existing overlap.

Consultations may be arranged or questions answered by contacting Gary Petersen GSA General Manager at peterseng@svbgsa.org or by phone at 831-682-2592.
