Subject: Sacramento County Groundwater Sustainability Agency Changes in South American and Cosumnes Subbasins

Dear Mr. Norberg,

Sacramento County Groundwater Sustainability Agency (GSA) will make small, non-material changes in the South American and Cosumnes Subbasins to the Sacramento County GSA boundary by submitting new shapefiles to the Department of Water Resources (DWR) Sustainable Groundwater Management Act (SGMA) GSA portal. Groundwater management in the subbasins is not affected by these non-material changes. This letter documents the reasons for the changes, as listed by subbasin below.

South American Subbasin

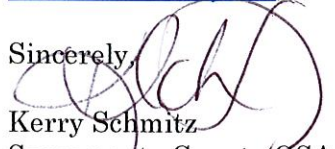

A new shapefile submitted to the SGMA GSA portal truncating the water body at the northern and eastern edges of the Sacramento County GSA boundary will not affect groundwater management in the Sacramento County GSA in relationship to small water bodies and the beds of those water bodies. As this very small area will become part of the Sacramento Central Groundwater Agency (SCGA) GSA, they know of the change and do not have any issues with the change.

Cosumnes

At the October 6, 2020 City of Galt council meeting the City annexed very small "islands" of the Sacramento County GSA residing within the City of Galt GSA boundary (map attached). This change involves removal of a small area from the Sacramento County GSA, with the City of Galt GSA adding this area. The removal of Sacramento County GSA "islands" within the City of Galt GSA will not change groundwater management actions by either GSA.

GEI Consultants Inc., will submit to the DWR SGMA GSA portal the new Sacramento County GSA shapefiles for these non-material changes to the Sacramento County GSA in these subbasins. If you have any questions please contact me at schmitzk@saccounty.net, 916-874-4681 or Linda Dorn, dornl@saccounty.net, 916-874-1085.

Sincerely,

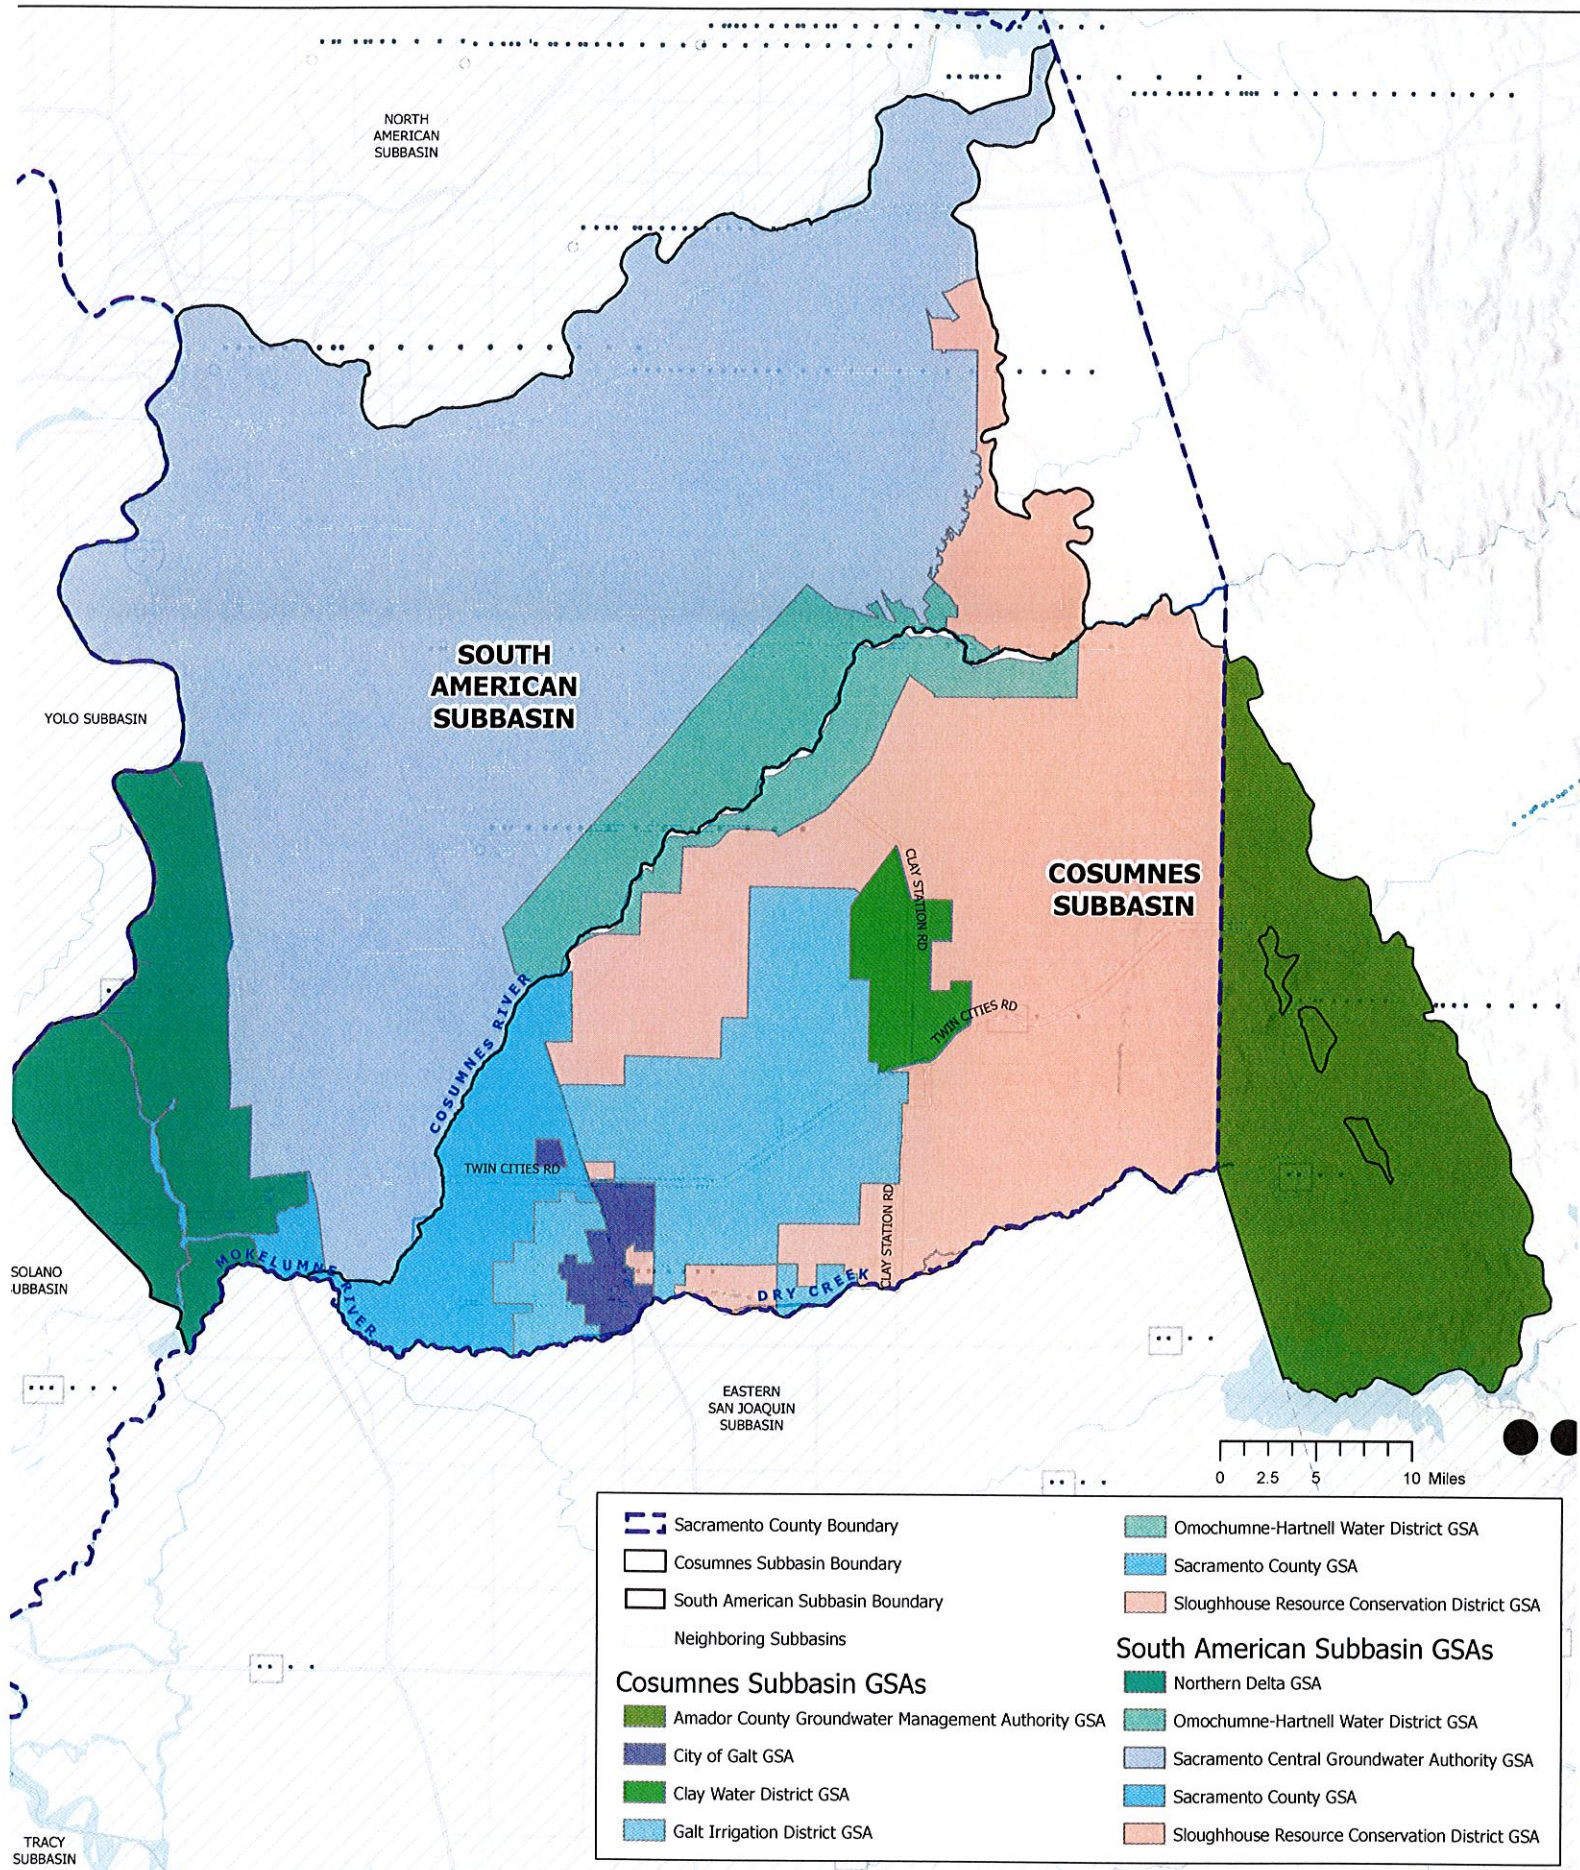

Kerry Schmitz
Sacramento County GSA
