GEORGE H. ELDRIDGE, RALPH ARNOLD, AND
WILLIAM L. WATTS HONORARY MAP

Map Dedication: This map honors the important contributions of some of the "old timer" geologists, especially George H. Eldridge, Ralph Arnold and William L. Watts, whose initial geologic mapping of southern Ventura County helped to establish oil and gas exploration there.

ACKNOWLEDGMENTS

Executive Committee: Arthur O. Spaulding, President; Arthur R. Brown, Vice President; William E. Kennett, Vice President; John R. Powell, Secretary; Theodore C. Treasurer; Thomas W. Dibblee, Jr., Director, and Helmut E. Ehrenspeck, Editor

Production Management: *Helmut E. Ehrenspeck*

Graphics: Final drafting by Sharon Kuromiya, Santa Barbara; map design, geology, color scheme and color process by H. E. Ehrenspeck; typography by Sharon Kuromiya, Santa Barbara; printing by the Blake Printery, San Luis Obispo.

Second Edition, 2008

Dibblee Geological Foundation Advisory Committee: *John R. Powell, Arthur Brown, Donald D. Clarke.*

Editing and Production Management: John A. Minch
Graphics: Map computer drafting, preparation, and map design by Jason I. Minch
Laguna Hills; technical review assistance by Susan Bartz; printing by Santa Barbara
Museum of Natural History

Contributors: The first edition of this map was published by the Dibblee Geological Foundation, a non-profit, California educational corporation dedicated to the geologic sciences. The second revised edition was updated, digitized and published by the Santa Barbara Museum of Natural History. Publication has been made possible through the generous financial support of many individuals and organizations. Your support encouraged and appreciated. Major contributors to the first edition are listed below:

Atlantic Richfield Oil Company, Los Angeles, California
Yvonne Dibblee Donohoe, Atherton, California
Emcon Associates, Camarillo, California
Fugro-McClelland, Staal, Gardner & Dunne, Inc., Ventura, California
Frances S. Knowles, Santa Barbara, California

GEOLOGICAL SYMBOLS
 not all symbols shown on this page

FORMATION CONTACT dashed arrow inferred or contact where concealed	MEMBER CONTACT inferred only if the contact were prominent bed	CONTACT inferred only approximately in place
---	---	---

FOLDS:

arrow on axial trace of fold indicates direction of plunging; dotted lines where concealed by surficial sediments

Strike and dip of sedimentary rocks

Legend: 15° (inclined), 90° (vertical), 85° (overturned), horizontal, vertical

Strike and dip of metamorphic or igneous rock foliation or compositional layers

Legend: 75° (inclined), 90° (vertical), overturned

OTHER SYMBOLS:

Direction of ice/water movement: ice/water (arrow), ice/water (arrow), ice/water (arrow), ice/water (arrow), ice/water (arrow)
