Neal Hay, Director
Sutter County Development Services
1160 Civic Center Blvd, STE A
Yuba City, CA 95993

Re: Butte Subbasin Groundwater Sustainability Plan

Dear Mr. Hay:

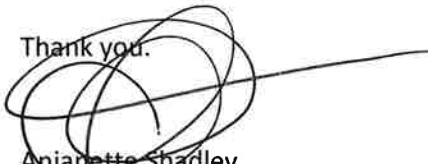

On behalf of the Butte Subbasin Groundwater Sustainability Agencies and pursuant to the Sustainable Groundwater Management Act (SGMA), Groundwater Sustainability Agencies (GSA) must submit a Groundwater Sustainability Plan (Plan) that will assure groundwater is sustainable within 20 years. In Butte County, the Butte subbasin is required to have a Plan submitted by January 31, 2022. Eleven GSAs has signed a cooperation agreement to jointly develop a single Plan. SGMA requires GSAs provide at least a 90 day notice to cities and counties prior to adoption of a Plan. Through this letter, we are providing notice of the Plan development (Water Code §10728.2).

SGMA recognizes the linkage between land use and groundwater management. Projects and actions could include recommendations for changes to land use, general plans, zoning and ordinances under your jurisdiction. The Plan takes into account projected growth from existing general plans. In the future, anytime a city or county readopts or substantially amends their general plan the planning agency shall review and consider an adoption of, or update to, a groundwater sustainability plan. (Under Government Code § 65350.5) We look forward to collaborating with you on groundwater sustainability in the Butte subbasin.

The entire Butte Subbasin Plan is expected to be released for a 60-day comment period in September, with a hearing in November. Adoption of the Plan is expected in December. When the entire draft Plan is prepared in September, we will provide you with a notice of its availability. In the meantime, draft chapters are available for review at buttebasingroundwater.org/gsp-info.

If you have any questions or would like more information, please contact me at 530.342.5083 or Dr. Christina Buck, Interim Director Butte County Water and Resource Conservation at 530.552.3592.

Thank you.
