Re: 90-Day Notice Requirements Pursuant to Water Code Section 10728.4

Dear Groundwater Sustainability Agency Managers,

As you know through our conversations and meetings, the County of Madera has been aware for more than 90 days of the Madera Subbasin (DWR No. 5-022.06) groundwater sustainability agencies (each a “GSA” collectively, the “Subbasin GSAs”) process of revising and resubmitting the four coordinated groundwater sustainability plans for the Madera Subbasin (each a “GSP”, and collectively, the “Subbasin GSPs”) in response to the Department of Water Resources’ (“DWR”) September 22, 2022, letter determining that the coordinated Subbasin GSPs were incomplete, identifying deficiencies, and specifying corrective actions for the Subbasin GSAs to undertake by March 21, 2023.

The County has been aware of the process for more than 90 days from the date of this letter and has informally consulted directly and through consultants with all parties throughout the process.

Very truly yours,

Stephanie Anagnoson
